

1,240 pts zone is the solid barrier

VN30 performance

The VN30 index formed the closing price at 1,232 pts. Relating to foreign trading, supply ticked up with net sell value recorded at VND37bn. Notably, foreign selling activity spread to HPG, PLX, and GAS.

VN30 Future chart: Approaching the solid selling zone

VN30F2208 entered the intraday trading range after approaching the solid selling zone 1,240 pts area. Major MAs continue to support the bearish swing and selling pressure is still maintained near 1,240 pts area. If this zone is broken, higher high and higher low pattern would be completely formed and the rebound phase would be strengthened. Notably, OI (Open Interest) keeps decreasing which means volatile trading environment would occur on this trading day. In this case, traders should tighten the current stop loss level for the captured long positions.

Technical strategy

Long position on VN30F2208 near 1,220-1,225 pts area should be held and stop the loss when there is the closing price below 1,215 pts level. (Hourly chart)
