

Selling pressure near 1,280 pts zone

VN30 performance

The VN30 index formed the closing price at 1,272 pts. Relating to foreign trading, foreign investors resumed to net buy with a net value of VND74bn on HSX. Demand was mainly spread to SSI, HDB, and VND.

VN30 Future chart: Retest the demand zone

VN30F2208 has entered the short-term pullback, increasing the tendency to retest the significant demand zone (1,250 pts area). Notably, 1,250 pts area is the benchmark for the rebound phase. If this zone is broken, rebound phase is faded. On Daily chart, major MAs are still on the fence which means minor pullback is needed to sustain the rebound period. OI (Open Interest) remained at high level, the bullish swing is still active and this swing has high probability to extend on upcoming sessions. In this case, traders should hold the captured long positions.

Technical strategy

Long position on VN30F2208 near 1,220-1,225 pts area should be held and close the positions when there is the closing price below 1,250 pts level. (Hourly chart)
