

# Solid demand near 1,100 pts zone

## VN30 performance

The VN30 index formed the closing price at 1,125 pts. To be specific, STB (+4.8%), TPB (+4.6%), and VJC (+2.9%) were top 3 index leaders. Relating to foreign trading activity, selling pressure came back with net sell value was VND135bn, mainly focused on VNM, VHM, and KHD.

## VN30 Future chart: Solid demand near 1,100 pts zone

Selling pressure has come back to the market but the demand is still strong near 1,100 pts zone. Although there is the active rebound phase, higher high is only confirmed when 1,150 pts zone is broken. The 1,050 pts area is the solid market short-term bottom. The rebound phase would completely control when 1,150 pts area is pierced. Demand has shown no sign of weakness due to the respected short-term MAs. However, new long position is not recommended due to the increase of volatility level. In this case, traders should wait for the consolidation phase which would be followed by the better trading point.

## Technical strategy

For new long positions, traders should wait for the short-term correction/consolidation phase on VN30F2302. (Hourly chart)
