Market commentary & News

Market commentary

Close almost unchanged

Hieu Tran
hieu.ttm@kisvn.vn

Vietnam stock markets diverged last Friday due to profit-taking on large-cap stocks.

At the close, the VNIndex closed almost unchanged at 943.3 pts. Meanwhile, trading volume decreased to 443 million shares or VND9,275bn.

Foreign investors continued to sell with a net value of VND423bn on HSX. They sold MSN, CTG, and VPB the most with net values of VND254bn, VND75bn, and VND27bn, respectively.

Energy was the market leader namely GAS (+0.5%), PVT (+0.7%), PVS (+0.7%), POW (+1.5%), BSR (+1.4%), and PLX (+0.3%) because global oil price resumed its uptrend.

Moreover, cash flowed into some constituents of VN30Index jumped more than 2%, such as CTG (+3.6%), FPT (+3.9%), PNJ (+4.7%), and VPB (+2.2%). Investors expected that their business results in 3Q20 would improve.

In contrast, EIB (-1.4%), MSN (-1.3%), and ROS (-2.2%) closed in red territory.

Despite the divergent session, the short-term uptrend is still intact as the VNIndex closes above the significant moving averages. Therefore, investors may hold their long position and focus on leading tickers.

Breaking news

- ▶ Vietnam: Vietnam is among a few economies with growth in 2020

With success in controlling the COVID-19 pandemic and also several support measures from the state bank and the government, Vietnam's economy has returned to growth at a moderate pace after recording a significant slowdown of just 0.36% YoY in 2Q20. According to the latest update of the World Economic Outlook from IMF, Vietnam is the only economy in the ASEAN-5 group (including Indonesia, Thailand, Malaysia, Philippines, and Vietnam) that is expected to see positive growth of 1.6% YoY in 2020 and 6.7% YoY in the following year 2021, which is also among the highest growth rate. (IMF)

Macro & strategy

Chart of the day

Resume short-term uptrend

Hieu Tran
hieu.ttm@kisvn.vn

- ▶ Market performance

The VNIndex maintained its uptrend last week thanks to high demand on some key tickers such as MSN and CTG.

- ▶ Chart: High liquidity supports the uptrend

The uptrend is still intact in the medium and long term as the VNINDEX closes above the 50-period and 100-period moving averages. Moreover, the index forms a new peak since March 2020.

In the short term, the index breaks out the 920-threshold and confirms the rectangle pattern, implying the bullish market. Short-term moving averages go up, and liquidity continues to be high level, showing positive signals.

The 920-pts zone, which overlaps with the MA20 and upper line of the rectangle pattern, is significant support. On the upside, 990-1,000 pts is the short-term resistance for the index.

→ The short-term uptrend is still active thanks to the confirmation signal of trending and momentum indicators.

- Technical strategy: Hold the positions

As mentioned above, investors should continue to hold the current positions and force on leading stocks such as Banking tickers.
