Market commentary & News

Market commentary

A second losing session

Hieu Tran
hieu.ttm@kisvn.vn

The Vietnam stock market maintained its downtrend because of profit-taking on large-cap stocks.

At the close, the VNIndex lost 0.68% to close at 1,238 pts. Meanwhile, trading volume was 951 million shares or VND21,047bn.

Foreign investors continued to sell with a net value of VND558bn. They sold VHM, HPG, and VNM the most with net values of VND179bn, VND156bn, and VND148bn, respectively.

Banking was the worst sector driven by CTG (-0.5%), VCB (-1.2%), BID (-2.4%), HDB (-2.6%), TCB (-1.1%), ACB (-2.2%), MBB (-1.3%), STB (-1.3%), and VPB (-2.1%).

Some constituents of the VN30Index slid more than 2% such as TCH (-4.2%), PLX (-2.9%), BVH (-2.7%), SSI (-2.4%), VNM (-2.2%), and VJC (-2.1%).

In AGM, VCS (-0.1%) targeted revenue of VND6,797bn (+20% YoY), and PBT of VND1,919bn (+15% YoY). Besides, the firm delayed plans to list on HSX due to trading overload issues on HSX.

AAA (-0.3%) posted a VND2,280bn revenue (+45% YoY) and a VND89bn net income (+41% YoY) in 1Q21. It expects revenue of VND2,500bn (+38% YoY) and net income of VND120bn (+62% YoY) in 2Q21.

In contrast, VIC (+1.5%), NVL (+5.4%), KDH (+1.0%), PDR (+5.0%), and MSN (+0.1%) closed in green territory.

The VNIndex closes below the upper line of the small rectangle pattern, implying a false of the pattern. The uptrend is not clear in the short term. Therefore, traders should be careful and wait for the next signal.

Breaking news

Tuan Doan
tuan.doan@kisvn.vn

▶ Vietnam: Export being revised up in March

In the month-end of 1Q21, trade activity experienced improvement this month as export made a turnaround and import accelerated after Tet's holiday. According to the latest data from VN Customs, total export was revised up to USD29.65bn from USD28.60bn in the previous estimate, increasing 22.88% YoY. Meanwhile, the total import was also reported slightly higher than GSO's estimates, to USD28.46bn from USD28.20bn, increasing by 28.49% YoY. As a result, the trade balance in March was nearly triple the previous estimate, at USD1.19bn. (VN Customs, KIS)

Macro & strategy

Chart of the day

The short-term tightening phase

Dang Le
dang.lh@kisvn.vn

▶ Market performance

The VNIndex consolidated last week, forming the short-term congestion zone at 1,250-1,260 pts.

▶ Chart: The uptrend is still active

Narrow spread candles (especially the formed candle on Friday) occurred with above average volume, implying the surge of volatility level.

MA20 and MA50 are still sloping upward as well as Bollinger bands are expanding, the bullish market is active. However, bullish momentum is faded in the short-term due to the flat MA5 and consolidation/correction phase is expected.

The broken 1,200 pts level has turned around to act as the most important short-term support. On the upside, 1,250-1,260 pts area is expected to be the weekly resistance.

→ The short-term consolidation/correction is expected to occur this week.

▶ Technical strategy: Buy or add at the most important support

As mentioned above, the all-time high is broken validly as well as bullish market is active. In this case, investors should hold the current positions and buy more on the first pullback (when 1,200 pts level is retested).
