

Testing the all-time high

VN30 performance

The VN30 index gained 1.1% to close at 1,500 pts. Among top 5 index weight tickers, MBB (+4.7%), TCB (+3.4%), VPB (+3.1%), and HPG (+1.6%) contributed significantly to the index gains whilst VNM (-0.4%) faded the benchmark and became index laggard. Relating to foreign trading activities, selling activities kept overwhelming, with net sell value recorded at VND720bn, mainly focusing on VHM, VIC, and HPG.

VN30 Future chart: Upward resumption phase

VN30F2108 increased strongly, there is the tendency for the instrument to retest the all-time high (1,580 pts zone). Particularly, the instrument closed above major MAs on Daily chart, implying the valid upward swing. With congestion zone, 1,450 pts area keeps acting as the strong support zone whilst 1,490 pts is the main intraday support level. Although there was the bullish swing yesterday, 1,510 pts zone is still held. In this case, traders should hold the long positions and add more when 1,490 pts level is revisited.

Technical strategy

The captured long positions at 1,485 pts zone should not be closed and out the positions when there is the closing price below 1,465 pts level (Hourly chart). For new positions, traders could open the long positions on VN30F2108 at 1,490 pts area and set the stop loss below 1,465 pts level (Hourly chart).
