VN30 Future chart: Upward resumption phase

VN30F2110 keeps following the upward swing, increasing the tendency for the instrument to retest the all-time high (1,550 pts zone). With congestion zone, 1,430 pts zone is the intraday support zone whilst 1,550 pts area is the significant supply zone. Subsequent bullish candles occurred with above average volume, implying the increasing of buying activity. In this case, traders should hold the current long positions and trigger the new long positions on the pullback.

Technical strategy

Long positions on VN30F2110 (captured at 1,457 pts zone) should not be closed and stop the loss when there is the closing price below 1,435 pts level (Hourly chart). For new long positions, traders need to wait for the pullback to trigger the positions.
