

The uptrend is still active

VN30 performance

The VN30 index formed the closing price at 1,505 pts. Relating to foreign trading activities, buying activity surged with net buy value recorded at VND75bn. Notably, foreign demand focused on VHM, VNM, and CTG.

VN30 Future chart: Consolidating

VN30F2110 has followed the range movement, but the uptrend is still active. Subsequent narrow candles occurred with above average volume, implying the increase of volatility level. However, the uptrend is still active thanks to the upward crossover between major MAs. With congestion zone, 1,450 pts zone is the strong support zone whilst 1,550 pts area is the significant supply zone. In this case, long positions should be held but re-entry point for new long positions is not ready.

Technical strategy

Long positions on VN30F2110 (captured at 1,457 pts zone) should not be closed and stop the loss when there is the closing price below 1,450 pts level (Hourly chart). For new long positions, traders should wait for the pullback to trigger the positions.
