## Market commentary & News

### Market commentary

#### Market is divergent

**Hieu Tran**  
hieu.tm@kisvn.vn

The stock market was a divergence in the absence of positive information.

At the close, the VNIndex closed almost unchanged to close at 1,505 pts. Meanwhile, the trading volume was 900 million shares or VND29,543bn.

Foreign investors continued to net buy with a net value of VND474bn on HSX. They purchased VPB, MSN, and PNJ the most with net values of VND891bn, VND72bn, and VND69bn, respectively.

Brokerage was the market leader because of BVS (+0.48%), HCM (+1.33%), SHS (+1.14%), SSI (+2.42%), VCI (+0.95%), and VND (+0.26%).

Some constituents of the VN30Index jumped more than 1%, such as PDR (+2.50%), MSN (+2.20%), PNJ (+2.20%), and VRE (+1.05%).

In contrast, Energy closed in the red territory, due to BSR (-1.77%), GAS (-2.24%), OIL (-3.40%), PLX (-2.71%), PVB (-5.10%), PVD (-2.50%), PVS (-3.22%), and PVT (-1.44%).

Despite the bullish market, the downside risk is intact as the selling pressure can appear at the 1,510-pts threshold. Therefore, traders should be careful and stay on the sidelines until the VNIndex closes above the 1,510-pts zone.

### Breaking news

**Tuan Doan**  
tuan.doan@kisvn.vn

- ▶ World: Geopolitical tension between Russia – Ukraine puts massive pressure on the agriculture sector

Vietnam's Ministry of Agriculture and Rural Development recently assessed the initial impact of the Russia – Ukraine war on the agriculture, forestry, and fishery sectors. Accordingly, trade activities with Russian and Ukraine trading partner were almost unable to process due to difficulties in payment via the banking system, logistics services, etc. For import activities, Vietnam was importing wheat (about 20% of total wheat import), corn (3% of total corn import), and fertilizers (10% of total fertilizers import) from Russia and Ukraine. As a result, under the assessment, "the price of input materials such as wheat, corn, etc. has increased about 10% - 20%, the price of fertilizer has increased by more than 20% recently, adversely affecting the livestock and farming industry", said the Ministry of Agriculture of Rural Development. Furthermore, about USD500mn of exporting agricultural products to Russia per year is also likely interrupted. (The Ministry of Agriculture and Rural Development, vietnambiz.vn)

## Macro & strategy

### Chart of the day

#### High probability for the upward resumption phase

**Dang Le**  
Dang.lh@kisvn.vn

- ▶ Market performance

Last week, VNIndex kept following the rigid price movement, but the bullish resumption phase has high probability to occur.

- ▶ Chart: Bullish momentum is improved

The VNIndex kept closing above major MAs, implying the increase of bullish momentum and there is high probability for the breakout at the all-time high.

The medium-term uptrend is still active thanks to the upward sloping MA200 and MA50.

The 1,400-1,420 pts zone acts as the significant demand zone for the upward swing. On the upside, 1,550 pts area is the barrier for the upward resumption phase. Notably, 1,470 pts zone is the benchmark for the current bullish swing.

→ The Index is expected to form the valid breakout this week.

- Technical strategy: Hold the positions

The medium-term trend is still supported as well as there is the tendency for the valid breakout to occur. In this case, investors should continue to hold the current positions on leading stocks and position size should be closed by half when the 1,470 pts zone is pierced.
