# Retest 1,300 pts area

## **VN30** performance

The VN30 index formed the closing price at 1,311 pts. Relating to foreign trading, foreign investors continued to net sell with a net value of VND162bn on HSX. They sold DGC, SSI, and HPG the most.

# VN30 Future chart: Positive reaction at the solid demand zone

VN30F2209 attracted demand near 1,250 pts zone, retesting the selling zone – 1,300 pts area. However, the instrument has high probability to enter the short-term consolidation phase due to the balance stage of demand and supply. Notably, 1,250 pts area is the benchmark for the rebound phase. If this zone is broken, rebound phase is faded. On Daily chart, major MAs confirm the bear market rally. OI (Open Interest) continued to increase which means the market swing is still active. However, selling pressure is still active near 1,300 pts zone which means intraday correction could occur. In this case, traders should stay on the sidelines and wait for accurate trading point.

## **Technical strategy**

Although VN30F2209 has attracted buying activity near the demand zone, buy point is still not confirmed. In this case, traders should stay on the sidelines and wait for accurate trading point.
