## **VN30** performance

The VN30 index formed the closing price at 1,002 pts. Relating to foreign trading, foreign investors' selling pressure is active with a net sell value of VND380bn. Selling activity mainly spread to HPG, STB, and CTG.

## VN30 Future chart: Bearish momentum is still strong

Selling pressure is still active when 950-1,000 pts area is approached. Besides, selling pressure near 1,050 pts area is still strong which means intraday rebound phase has high probability to be paused at this zone. Notably, OI (Open interest) decreased below 45,000 contracts, implying that the bearish swing could be paused in this trading session or consolidation phase would step in. Spread between VN30F2210 and VN30 Index are widening, signaling the surge in volatility level in upcoming session. As the bearish swing is still active and selling pressure is still high near 1,050 pts zone, the intraday rebound phase should be used to trigger new short position.

#### **Technical strategy**

The captured short positions on VN30F2210 should be held and stop the loss only when there is the closing price above 1,150 pts level. (Hourly chart)
