

Inflow across Vietnam tends to be weaker

Vietnam foreign flow

Foreign demand kept decreasing but buying activity still overwhelmed. Net buy value was USD61mn.

Particularly, foreign demand was mainly absorbed by Utilities, Materials and Financials, focusing on VPD, HPG, SHB, STB, VND and CTG. On the contrary, large sell orders were concentrated the most on EIB with net sell value recorded at VND1,634bn, then followed by SAB, VRE and VGC.

South East Asia ETF flow

Last week, the flow of money across SEA remained low compared to the average inflow of the last 3-months. Net inflow was USD5mn (+5.x wow, -84.3% mom). The positive inflow was mainly bolstered by inflow across Vietnam's major ETFs whilst outflow across Indonesia, Philippines and Thailand was significantly decreased.

The flow of money across Vietnam has remained positive for 3 consecutive months. However, inflow kept weakening last week, recorded below 3-month average with net inflow was USD22mn (-29% wow). The positive flow of money mainly driven by the strong demand on VanEck and Fubon. Though Vietnam has attracted the high level of positive flow of money for 3 consecutive months, the weaker inflow occurred in 3 consecutive weeks are the signals of possibly reverse of positive inflow across Vietnam. Otherwise, we still expect that the flow of money across Vietnam would remain positive in upcoming weeks.
